Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, drawn to an adaptive antenna control method wherein an interference wave power is estimated, classified in class 455, subclass 562.1.
 - II. Claims 11-24, drawn to an adaptive antenna transmission/reception characteristic control method to control the directivity of an antenna of each base station, classified in class 455, subclass 25.
2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.
 - In the instant case, invention I has separate utility than invention II, such as an adaptive antenna control method, wherein for reception by each terminal station, an interference wave power given by a transmission signal from each of a plurality of radio base stations is estimated.
 - Invention II has separate utility than invention I, such as an adaptive antenna transmission/reception characteristic control method to control the directivity of an antenna of each base station, wherein a directivity characteristic of the antenna of each base station is changed on the basis of the received signals to reduce an interference power between the terminal stations.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and have acquired a separate status in the art because of their recognized divergent subject matter, and the search required for

each invention is not required for the other, restriction for examination purposes as indicated is proper. See MPEP § 806.05(d).

4. A telephone call was made to Applicants' representative, Kenneth Allen (Reg. No. 27,301), on November 30, 2004, to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

6. Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(i).

7. A shortened statutory period for response to this action is set to **expire 0 (zero) months and 30 (thirty) days** from the mail date of this letter. Failure to respond within the period for response will result in **ABANDONMENT** of the applicant (see 35 U.S.C 133, MPEP 710.02, 710.02 (b)).
